FIT AND SECURE

2.1

Before you start with the fitment of the Foot Rails (Items 1 & 2), you need to remove the factory roof rails.

Do this by unclipping and removing the front and rear end-caps of the roof rail. In the middle of the roof rail you will see a small cover plate, this will also need to be removed.

Now loosen & remove the two bolts in front, two bolts in the middle and two bolts at the rear of the roof rail.

After you have removed all the bolts, remove both the roof rails from the vehicle.

2.2

Assemble the front and rear Foot Rails (Items 1 and 2) with the Joiner Plate (Item 9) using M6 x 16 Button Head Bolts and M6 Nyloc Nuts (Items 8, 9, & 11) as shown.

Use M6 Nut Caps (Item 11) to finish off the nuts.

2.3

Place a bead of sealant around each of the M8 x 40 Hex Bolt threads (Item 4).

Place the Spacers (Item 7) over the holes where you removed the bolts from in Step 2.1, followed by the Foot Rails that you assembled in Step 2.2.

Ensure that the Front Runner logo is at the back of the vehicle.

Secure the Foot Rails using the M8 x 40 Hex Bolts with sealant on the threads, M8 Spring Washers and M8 x 16 x 1.6 Flat Washers (Items 4, 5 & 6).

Use M6 Nut Caps (Item 3) to finish off the nuts.
